

Stage Platforms

SM - Stairs

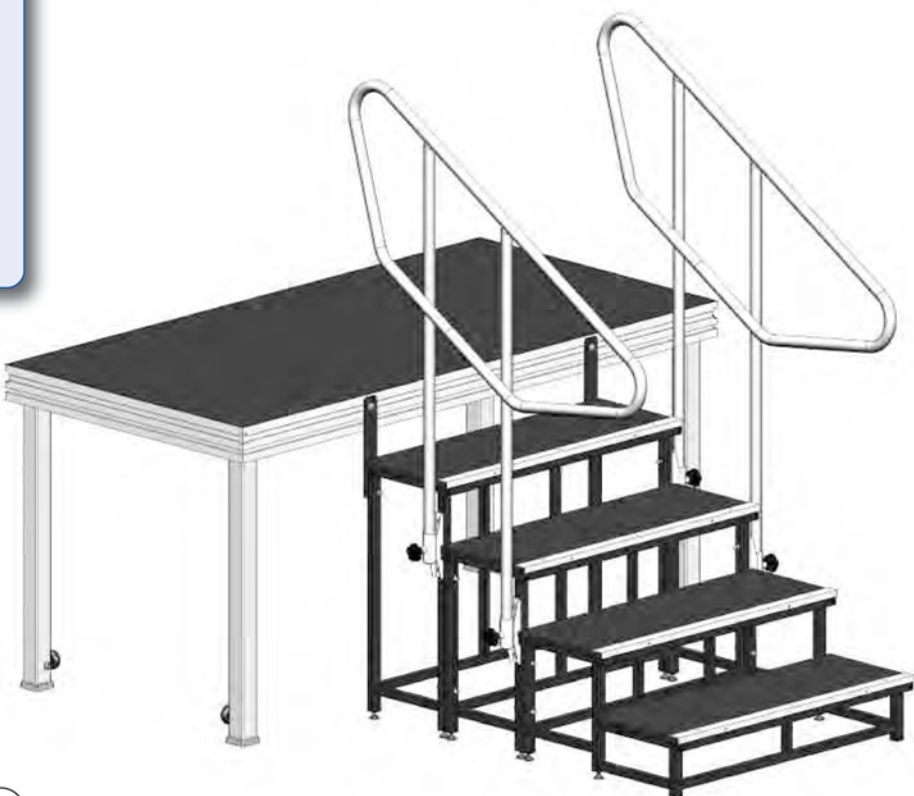

Modular as easy:

SM - STAIRS

Modular stairs with all steps of the same height; available in four different heights.

The stairs have adjustable feet which make it possible to place and level the stairs on uneven surfaces.

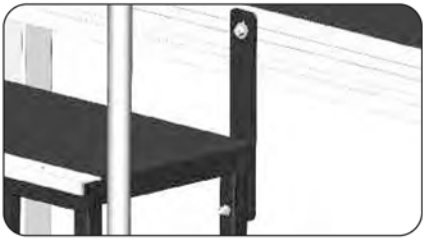

The material of the construction is welded from steel profiles, the steps are made of 15mm plywood by a foot adjustment-range of 20mm.

Handle rails

Connecting stair steps

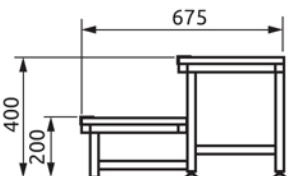

Attachment to the platform

Modular Step Stairs
